LAUNCH OF FREE STATE POPULATION STRATEGY

The Department will on Friday 16th launch the Free State Population Strategy. The strategy has been a work-in-progress since the successful launch of the State of the Population Report in July 2011. The launch is a culmination of this work that started in 2011 and was carried out with the assistance and collaboration with the United Nations Population Fund (UNFPA)

The development of the Free State Population Strategy was in response to the developmental challenges and concerns around the province as revealed in the report. It aims at linking developmental challenges as noted therein to the Free State Growth and Development Strategy.

The strategy further links the Millenium Development Goals in the Free State and the goals and objectives of the Population Policy for South Africa and is mainly aimed at population development.
